

MASTER TAPPERS™

ROOF PANEL TO PANEL - SHEET TO STRUCTURAL

- High Hex Washer Heads provide excellent driver bit control and self tapping threads provide fast efficient steel fastening.
- Quadrex Low Profile Pancake Heads for Panel Clips also provide excellent driver bit control with either Phillips or square drive bits.
- Master Seal Washer System provides a water proof, no leak installation for siding or roofing. Also available without washers.
- The dished washers galvanized backing is vulcanized together with an EDPM sealing washer to form one piece.
- Spiral fluted threads relieve torque and eliminate, roll-over when driving.
- Indented Hex Heads available - Type A, B, AB - 3/4" to 4", #14 only.
- Master Tappers are available in Case Hardened Steel, HT3 (Modified) 304, High Tensile Stainless Steel - JS600 coated.
- **Applications:**
 - TYPE A - provides panel to panel fastening up to 14 gauge.
 - TYPE B - with a tighter thread configuration and blunt point provides sheet to pre-drilled structural installation 16 gauge and up.
 - TYPE AB - With a combination of tight thread configuration and sharp point for alignment provides installation of sheet to pre-drilled light structural up to 3/16 of an inch.

Longer lengths available on special quote. Type A, B, AB, 5" to 8".

Anti-corrosion finishes available for Master Tappers

Standard Coating

**JS500
PLATING
SYSTEM**

Withstands 500 Hours Salt Spray test and 5 cycles in Kesternich (1 litre SO₂ per cycle) testing
No Red Rust

Longlife Coating

**DT2000
LONGIFE
COATING**

Withstands 2000 Hours Salt Spray test and 35 cycles in Kesternich (1 litre SO₂ per cycle) testing
No Red Rust

304 HT Stainless

JS600 Plated
**JS600
PLATING
SYSTEM**

High lubricity anti-corrosion protection for stainless steel
No Red Rust

Powder Coated

**POWDER
COATED
TOUGH™**

Exceeds 50 cycles in Kesternich (2 litre SO₂ per cycle) testing 3000 hrs. salt spray
No Red Rust

Powder Coated or Spray Painted Fasteners are available in colors to match any roofing or siding

No Red Rust
