

MASTER CUSTOM FASTENERS

CUSTOM DESIGNED FASTENERS ENGINEERED TO YOUR SPECIFICATIONS

Leland Industries has the design expertise, engineering capability and manufacturing capacity to produce almost any specialty fastener required.

We have over 160 pieces of equipment for heading, thread rolling, slotting, trimming, point forging, shank slotting, cold nut forming, assembly, painting and packaging.

We have a complete tool room, material handling and inspection department. Contact Leland Industries for complete information on your specialty requirements.

Standard Coating

**JS500
PLATING
SYSTEM**

Withstands 500 Hours
Salt Spray test and
5 cycles in Kesternich
(1 litre SO₂ per cycle) testing
No Red Rust

Longlife Coating

**DT2000
LONGLIFE
COATING**

Withstands 2000 Hours
Salt Spray test and
35 cycles in Kesternich
(1 litre SO₂ per cycle) testing
No Red Rust

304 HT Stainless

JS600 Plated
**JS600
PLATING
SYSTEM**

High lubricity
anti-corrosion protection
for stainless steel
No Red Rust

Powder Coated

**POWDER
COATED
TOUGH™**

Exceeds 50 cycles in
Kesternich
(2 litre SO₂ per cycle) testing
3000 hrs. salt spray
No Red Rust

ACQ Compatible

**DT1700
LONGLIFE
COATING**

Withstands 1700 Hours
Salt Spray test and
18 cycles in Kesternich
(1 litre SO₂ per cycle) testing
No Red Rust
